INTRODUCTION AND OVERVIEW

Introduction

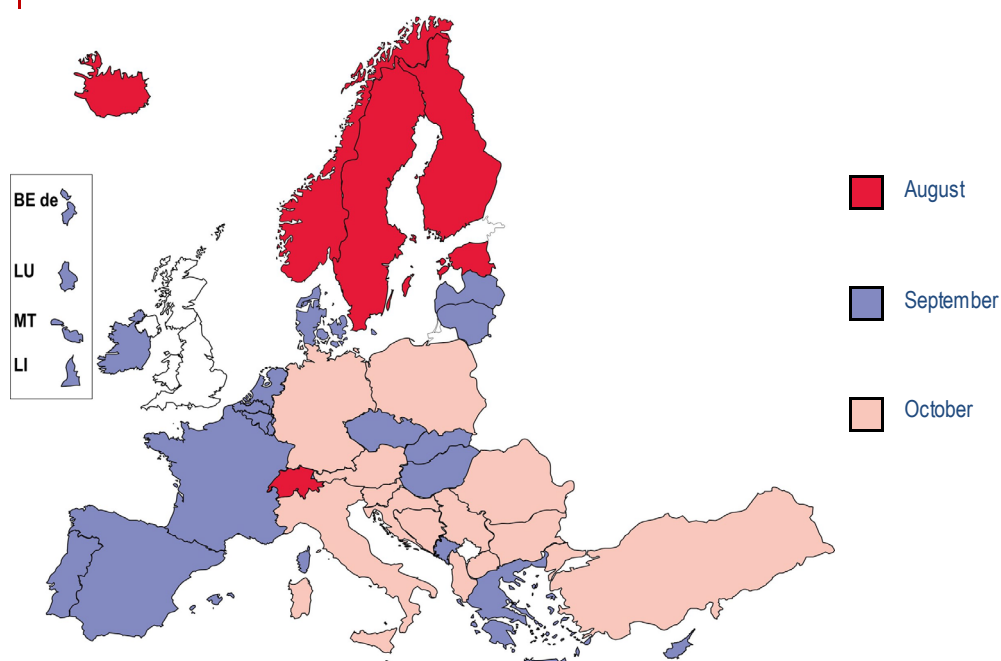

Higher education institutions work together across national boundaries in many contexts. Ever-increasing cooperation has been facilitated in recent years by improving the level of understanding of system differences, as well as working in a common policy direction that brings increased convergence. Over the past twenty years across Europe degree structures, for example, have converged into three main cycles, structured using ECTS credits. In general terms bachelor, master and PhD qualifications are widely recognised throughout the continent.

Does the organisation of the academic year also facilitate cooperation in Europe? Planning work, and especially mobility periods for students and staff would certainly be easier if the academic year started and finished at the same time, and if it were divided into the same or similar number of teaching periods. This report, outlining the key aspects of academic calendars in each Eurydice member country, shows the extent of such similarities and differences in Europe.

Beginning of the academic year

The organisation of the academic year displays significant national diversity – and sometimes variation within countries regarding how different types of institution organise their year. Three main patterns emerge when looking at the month that the academic year begins (Figure 1).

Figure 1: Month when the academic year begins, 2021/22

Source: Eurydice.

Country-specific note

Bulgaria and Liechtenstein: The reference year is 2020/21.

A few countries/higher education systems begin the academic year as early as August. These are mostly Nordic countries, but also include Estonia and Switzerland (although in the case of Switzerland, the official beginning of the academic year precedes the start of teaching activities by around six weeks). The majority of countries (20 higher education systems) begin the academic year in September, while a further 13, mostly in South and Eastern Europe, start in October.

The reasons for different starting dates for the academic year are undoubtedly related to national, cultural and geographical distinctions. While at first sight August to October may not seem a particularly significant time range, it can actually amount to a difference of between 10 to 12 working weeks for institutions situated in the more “extreme” systems. As the average length of a teaching semester is less than 15 weeks, this can indeed be a substantial variation.

Such differences in the start of the academic year could be difficult to factor into some forms of institutional cooperation (e.g. international joint programmes, joint research projects, or establishing European University Networks).

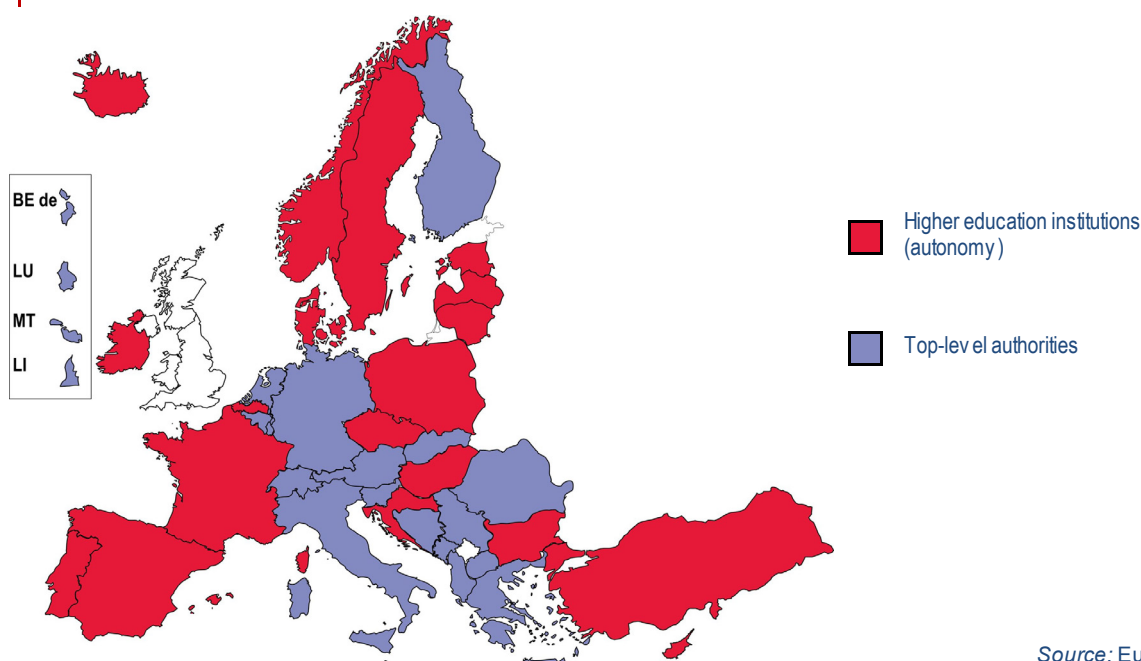

End of the academic year

While the date of the start of the academic year is significant in revealing different patterns for the academic calendar, the end date of the academic year is most often set the day before the new academic year begins. Thus for systems beginning officially on 1 September, the end date would typically be 31 August.

Institutional autonomy

Many countries point to institutional autonomy in their system with regard to setting the start date of the academic year. As Figure 2 illustrates, Europe can be divided in two parts – those countries where the decision on when to begin the academic year is left to higher education institutions’ autonomy, and other countries where the date is set by top-level authorities.

Figure 2: Responsibility for setting start of the academic year, 2021/22

Country-specific notes

Bulgaria and Liechtenstein: The reference year is 2020/21.

There are almost exactly the same number of systems where the decision on setting the start of the academic year is left to higher education institutions (20) as there are systems where the decision is taken by top-level authorities (19). In some cases, such as Belgium (Flemish Community), while higher education institutions may be responsible for setting the date, they have to do so within limits set by top-level authorities.

There is no obvious relationship between this decision-making role and the actual date that is set. In other words, top-level authorities appear to be no more or less likely than higher education institutions to pick a particular month for the academic year to begin.

Semester organisation

While clear-cut differences can be seen in both the responsibility for setting the start of the academic year, and the month when the academic year actually begins, there is one aspect of the organisation of the academic year which is shared across all countries. This is the organisation of the year into two main semesters. While the length of semesters may vary between countries, and the start and end dates of semesters may be very different, the semester model itself is used in all higher education systems.

KEY POINTS

- 1) The degree of national diversity in the start dates of the academic year in Europe could pose challenges to some forms of European cooperation.
- 2) While decision-making on the start of the academic year may be the responsibility either of public authorities or of higher educational institutions, this seems to make little difference to the actual decision.
- 3) A common model based on two semesters has been adopted in all European higher education systems.

Additional notes

Although different universities in Croatia (nine public universities in total) – and individual faculties and schools in some universities – are fully autonomous in deciding on their own individual academic calendar, the calendar provided above is the actual calendar for the largest Croatian university, University of Zagreb, and is the most common template.

Teaching activity in the first ('winter') semester of the academic year generally starts at the end of the September or beginning of October. All faculties traditionally have a two-week Christmas and New Year break in the last week of December and first week of January. After this break, the teaching activity of the first semester is resumed and it goes on until late January. The winter exam session generally takes place between the end of January and mid- or end of February. Teaching activity in the second ('summer') semester begins in late February and lasts until late May or early June. The summer exam session takes place from mid-June to mid-July, followed by a summer break until late August, when the autumn exam session is scheduled. It ends mid or late September.

Article 80 of the Act on Scientific Activity and Higher Education (*Zakon o znanstvenoj djelatnosti i visokom obrazovanju*, Official Gazette, 123/2003, 198/2003, 105/2004, 174/2004, 02/2007, 46/2007, 45/2009, 63/2011, 94/2013, 139/2013, 101/2014, 60/2015, 131/2017, 96/2018) stipulates that the academic year starts on 1 October of the current year and ends on 30 September the following calendar year. Additional notes

The academic year begins on 1 September each year and ends on 31 August of the following year (1 September 2021 – 31 August 2022). Teaching activities are divided into two semesters.

Higher Education Institutions (HEIs) in Greece are autonomous as regards to their *modus operandi*. The exact dates for the beginning and end of each semester are defined by the HEI's Senate or Board. Only in exceptional cases is the semester's extension allowed in order to cover the necessary teaching weekly hours of a module, but in no case can this extension be more than two weeks. The internal regulation of the institution regulates the arrangements of the study programme.

Each semester includes at least 13 weeks of teaching. The end of each semester marks the beginning of the exam period. During the period of exams, no teaching activity is taking place, so that students can take part in the exams. Students may be reassessed in the modules of both semesters before the beginning of the winter semester, during September. Students, who have certified dyslexia before their entry to the HEI, can be examined orally.

Students who have completed full-time attendance, meaning they have attended the necessary number of semesters leading to a degree, have the opportunity to take part in the exams at any semester, either winter or spring. This means that they can be examined in any course they choose regardless if it is taught in the winter or spring semester.

The total academic days and the total number of holidays cannot be estimated because the exact dates for the beginning and end of each semester are determined by each HEI's Senate or Board. Hence, dates in the academic calendar may vary slightly depending on the institution.

- ⁽¹⁾ Higher education institutions (HEIs) in Hungary are usually open all year around for students, who can use libraries, computer rooms and other facilities of the HEI, except on Sundays, on state and church holidays. (Most of the HEIs are also closed between Christmas and New Year, and in August.)
- ⁽²⁾ The Act on Higher Education stipulates that the academic year lasts 10 months (12 months for doctoral programmes) and one term lasts 5 months (from 1st September to 31st January, and from 1st February to 31st August for doctoral programmes). The organisation of the academic year is within the competence of HEIs.
- ⁽³⁾ Holidays and non-teaching days: the study and examination regulations of HEIs specify the number of days that the head of the HEI (or a specified head/s) may rule to be a non-teaching day for students of the entire HEI above the official public and church holidays. This number is usually not more than five days.
- ⁽⁴⁾ Number of intervals: the academic year in Hungary consists of two terms, in practice an autumn term (*ősz* *féltév*) and a spring term (*tavasz* *féltév*).

Moreover, majority of the HEIs do not have their academic calendars available on their webpages at the moment of filling in the current update, so calendars from previous years and common practices were used to generate expected and approximate calendar for the next academic year.

According to the Law on HE, article 79, the academic calendar is comprised of 30 working weeks.

There are 6 non-working public holidays in Serbia that are listed above.

The Organisation of the Academic Year in Europe – 2021/22

The academic calendar contains national data on how the academic year is structured (beginning of the academic year, term times, holidays and examination periods). Differences between university and non-university study programmes are also highlighted. The information is available for 37 countries.

The Eurydice Network's task is to understand and explain how Europe's different education systems are organised and how they work. The network provides descriptions of national education systems, comparative studies devoted to specific topics, indicators and statistics. All Eurydice publications are available free of charge on the Eurydice website or in print upon request. Through its work, Eurydice aims to promote understanding, cooperation, trust and mobility at European and international levels. The network consists of national units located in European countries and is co-ordinated by the European Education and Culture Executive Agency (EACEA).
